

Safe Start for Long Term Care Recommendations and Requirements: Nursing Homes and Intermediate Care Facilities for Individuals with Intellectual Disabilities

Introduction

Safe Start for Long-Term Care (LTC) Facility Recommendations and Requirements

In response to requests for recommendations, the Department of Social and Health Services (DSHS) and the Department of Health (DOH) are presenting the following phased safe start plan for licensed and certified long-term care facilities and agencies. Given the critical importance of limiting COVID-19 exposure in long-term care residential care settings and certified supported living agencies, decisions on relaxing restrictions should be made:

- With careful review of various unique aspects of the different facilities and communities in which they reside;
- In alignment with the Governor's Proclamations; and
- In collaboration with state and local health officials.

This phased approach will help keep residents and clients healthy and safe.

Because the pandemic is affecting communities in different ways, DSHS, DOH and the Governor's Office should regularly monitor the factors for the Safe Start for LTC and adjust the Washington plans accordingly.

Residential Care Setting and Supported Living Provider Safe Start Requirements

1. *Follow the Centers of Disease Control and Prevention (CDC), Department of Health (DOH), and local health jurisdictions' (LHJs) (when applicable) infection control guidelines to slow COVID-19 spread.*
2. *Cooperate with the local health officer or his/her designee in the conduct of an outbreak investigation, including compliance with all recommended or ordered infection prevention measures, testing of staff, and testing of residents.*
3. *Follow this DSHS and DOH phased Safe Start for LTC plan which is based on the Governor's Safe Start phased plan.*

4. Follow the “Washington Phased Approach for Modifying Physical Distancing” and Governor Proclamations: [Safe Start Plan](#).
5. The LHI or DOH have the authority to return a facility to more restrictive operations in response to any infectious disease and/or COVID-19 outbreak by imposing non-essential visitor restrictions and services defined by the Governor’s Safe Start Plan.
6. The facility or agency cannot move into the next Safe Start for LTC phase until the Secretary of the Department of Health approves the next Safe Start county phase for the respective county. For example, facilities located in counties in Safe Start Phase 1, cannot move beyond phase 1 of the Safe Start for LTC plan until the county enters Safe Start Phase 2 or greater. The facility or agency must then meet the Safe Start for LTC phase criteria included in this document before moving forward.

Examples that may require a facility to return to a more restrictive phase of the Safe Start for LTC include new outbreaks of COVID-19 in their facility or the county returning to a more restrictive phase of the Safe Start for LTC, as determined by the LHI or DOH. The LHI and DOH under WAC 246-101-505 and WAC 246-101-605 have the authority to conduct public health investigations and institute control measures. [The definition of an outbreak in a LTC facility](#) is the presence of one positive case of COVID-19.

Individual facility types have state statute or rules that requires a facility to impose actions to protect the residents by activating their infection control plan.

All facilities and agencies must be prepared for an outbreak and make assurances they have;

1. Access to adequate testing: The facility must maintain access to COVID-19 testing for all residents and staff at an established commercial laboratory;
2. Capacity to conduct ongoing testing of residents and staff;
3. A response plan to inform cohorting and other infection control measures;
4. A plan to actively screen all staff and visitors per DOH guidance.
<https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/Employervisitorscreeningguidance.pdf>
5. Dedicated space for cohorting and managing care for residents with COVID-19 or if unable to cohort residents, have a plan which may include transferring a person to another care setting;
6. A plan in place to care for residents with COVID-19, including identification and isolation of residents. The facility or agency plans describing the identification, care and isolation of residents or clients may be requested by DSHS, DOH or the LHJs to conduct an outbreak investigation. Technical assistance for development of these plans can be received from LHJs.
7. Protected and promoted resident and client rights while following standards of infection control practices including when a resident or a client requires quarantine or isolation due to individual disease status or an outbreak in a residential facility or client home.

Section I – Safe start for Facilities

Phase 1

[COVID 19 Risk Assessment Dashboard](#)

Phase 1 is designed aggressive infection control during periods of heightened virus spread in the community and potential for healthcare system limitations, which may include factors such as staffing, hospital capacity, Personal Protective Equipment (PPE), and testing. Heightened virus spread (High COVID-19 activity) is defined as >75 cases/100,000 for two weeks. Check this dashboard to see what the metric is for your county. If your county is currently meeting the definition of heightened virus spread the facility will remain phase 1.

	<ul style="list-style-type: none"> • Plans must be in place to manage: <ul style="list-style-type: none"> ○ New admissions and readmissions with an unknown COVID- 19 status; ○ Residents who routinely attend outside medically-necessary appointments (e.g., dialysis). 	<ul style="list-style-type: none"> • Plans must be in place to: <ul style="list-style-type: none"> ○ Manage new admissions and readmissions with an unknown COVID- 19 status; ○ Monitor clients who attend outside medically-necessary appointments (e.g., dialysis); ○ Monitor staff who work with multiple clients in different houses.
Group Activities	<ul style="list-style-type: none"> • Restrict group activities. • Engagement through technology is preferred to minimize opportunity for exposure. • Facilities should have procedures in place for residents to engage remotely or virtually, where possible, in activities that improve quality of life (e.g. church service, art classes, concerts, etc.). 	<ul style="list-style-type: none"> • Restrict group activities. • Engagement through technology is preferred to minimize opportunity for exposure. • Facilities should have procedures in place for clients to engage remotely or virtually, where possible, in activities that improve quality of life (e.g. church service, art classes, concerts, etc.).
Testing	<ul style="list-style-type: none"> • Testing will occur based on CDC, DOH, and LHJ guidance. • The facility must maintain access to COVID-19 testing for all residents and staff at an established commercial laboratory. 	<ul style="list-style-type: none"> • Testing will occur based on CDC, DOH, and LHJ guidance. • The facility must maintain access to COVID-19 testing for all residents and staff at an established commercial laboratory.

Phase 2

Entry Criteria:

If the county in which a facility is located has entered Phase 2, the facility may begin implementing the criteria outlined in the grid below after meeting **all** of the following criteria:

- The facility has reviewed the key metrics for the county at the [COVID 19 Risk Assessment Dashboard](#) and determined that moderate transmission is occurring in the community. Moderate transmission is defined as 25-75 cases/100,000 population for two weeks.
- 28 days have passed since the last positive or suspected resident/client or staff case was identified in the home **OR** any timeline required by the LHJ, whichever is greater;
- Adequate staffing levels are in place;
- The facility performs and maintains an inventory of PPE to assure at least a 14-day supply using the CDC PPE burn rate calculator: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/burn-calculator.html>;
- The facility performs and maintains an inventory of disinfection and cleaning supplies for residents and clients;
- There is assurance by the LHJ that local hospital(s) have the capacity to accept referrals/transfers;
- The facility/home is capable of cohorting residents with dedicated staff in the case of suspected or positive cases **OR** is able to transfer positive cases to a COVID-19 positive facility for care and recovery **OR** in the case of small homes, there is a plan in place for managing both positive and negative cases while mitigating the spread of infection.

Facilities or agencies may use discretion to be more restrictive, where deemed appropriate, through internal policies **and** in conjunction with the LHJ, even if they have moved to this Phase.

	<i><u>activity items, and there is proper environmental cleansing before and after the activities.</u></i>	<i><u>personal contact, and there is proper environmental cleansing before and after activities.</u></i>
Testing	<ul style="list-style-type: none"> • Follow CDC, DOH and LHJ direction for any required testing. • The facility must maintain access to COVID-19 testing for all residents and staff at an established commercial laboratory 	<ul style="list-style-type: none"> • Follow CDC, DOH and LHJ direction for any required testing. • The facility must maintain access to COVID-19 testing for all residents and staff at an established commercial laboratory

Phase 4

Entry Criteria:

*If the county in which a facility is located has entered Phase 4, the facility may relinquish all restrictions and return to a regular course of business after meeting **all** of the following:*

- The facility has reviewed the key metrics for the county at the [COVID 19 Risk Assessment Dashboard](#) and determined that sporadic transmission is occurring in the community. Sporadic transmission is less than 10 cases/100,000 population for two weeks.
- 28 days have passed since the last positive or suspected resident or staff case was identified in the home **OR** any timeline required by the LHJ, whichever is greater;
- The facility/home has adequate staffing levels in place;
- The facility performs and maintains an inventory of PPE to assure at least a 14-day supply using the CDC PPE burn rate calculator: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/burn-calculator.html>;
- The facility performs and maintains an inventory of disinfection and cleaning supplies for residents and clients;
- There is assurance by the LHJ that local hospital(s) have the capacity to accept referrals/transfers;
- The facility/home is capable of cohorting residents with dedicated staff in the case of suspected or positive cases **OR** is able to transfer positive cases to a COVID-19 positive facility for care and recovery **OR** in the case of small homes, there is a plan in place for managing both positive and negative cases while mitigating the spread of infection.

Facilities or agencies may use discretion to be more restrictive, where deemed appropriate, through internal policies and in conjunction with the LHJ, even if they have moved to this Phase.

Until the COVID public health threat has ended facilities will:

- Screen 100% of all persons, residents, and staff entering/re-entering the facility including: temperature checks, questionnaire about symptoms and potential exposure, observation of any signs or symptoms, and ensures all people entering the facility or home have cloth face covering or facemask;
- Maintain a log of all visitors which must be kept for 30 days;
- Use PPE, as determined or recommended by CDC, DOH, LHJs, and CMS guidelines as warranted;
- Universally mask;
- Maintain access to COVID-19 testing for all residents and staff at an established commercial laboratory.

Section II – Visitation

All facilities and agencies are required to provide accommodations to allow access for visitation for all residents and clients even if visitation is not allowed in-person due to the COVID status of an individual or the facility. This access and accommodation may be by phone, remote video technology, window visits or outside visits, or some combination of access, dependent on the phase of the county or facility/agency. Any equipment shared among residents should be cleaned and disinfected between uses according to manufacturer guidelines.

Once a provider has met the entry criteria outlined for a phase in Section I the provider may then follow the visitation criteria for each corresponding phase below:

Phase	Nursing Home Mitigation Steps	ICF/IID Mitigation Steps
<u>Phase 1</u>	Indoor visitation prohibited, except for: <ul style="list-style-type: none">• Compassionate care situations restricted to end-of-life and psycho-social needs; and• Under limited and controlled conditions, coordinated by the facility, in consideration of social distancing and universal source control (e.g.,	Indoor visitation prohibited, except for: <ul style="list-style-type: none">• Compassionate care situations restricted to end-of-life and psycho-social needs; and• Under limited and controlled conditions, coordinated by the facility, in consideration of social distancing and universal source control (e.g.,

***Visitor Log Information**

Visitor’s log information will include date, time in and time out, name of visitor and their contact information, including phone number and email address if available

**** Essential Support Person Requirements**

Recognizing the critical role family members and other close, outside caregivers have in the care and support of residents, and recognizing how they advocate for the resident, it is strongly recommended LTC facilities develop a process to designate an essential support person (ESP) where appropriate. An ESP could be an individual who was previously actively engaged with the resident or is committed to providing companionship and/or assistance with activities of daily living.

1. Facilities must establish policies and procedures for how to designate and utilize an ESP.
2. The resident must be consulted about their wishes to determine whom to designate as the ESP. Consider persons such as a family member, outside caregiver, friend, or volunteer who provided regular care and support to the resident prior to the pandemic.
3. Ensure scheduling of ESP visits considers numbers of ESP in the building at the same time. The facility may establish time limits as needed to keep residents safe.
4. The ESP must wear all necessary personal protective equipment (PPE) while in the building (minimally eye protection and face mask), and must perform frequent hand hygiene. The facility should ensure hand sanitizing stations and alcohol-based hand rubs are accessible
5. The ESP must not be allowed to visit a resident during a resident's 14-day quarantine, and must not visit when a resident is positive for COVID-19 or symptomatic, unless the visit is for compassionate care.
