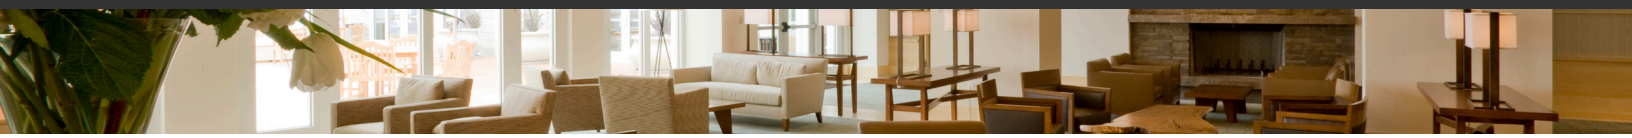
ASSISTED LIVING & MEMORY CARE



About the Data

SOURCES & METHODS

CarePrepare

CarePrepare™ (www.careprepare.com) is the first national assisted living and memory care regulatory database containing survey deficiency information for over 95% of AL/MC units in the United States, allowing users to assess communities' clinical performance including survey deficiencies, penalties, and complaints. Developed by NIC MAP and Formation Healthcare Group, CarePrepare™ normalizes state-level deficiencies into eight standard categories and 66 subcategories developed by an expert team of clinician executives and former surveyors from the senior housing industry. Deficiencies are also identified by severity level as applicable per state and benchmarked against state and local market peers. Data is refreshed quarterly.

About the Top Deficiencies Analysis

CarePrepare™ data was analyzed looking at the available state deficiencies as of March 19, 2025 from surveys occurring during the period January 1, 2023 to December 31, 2024. This two-year date range was utilized to capture citations due to the infrequent nature of survey activity in some states for seniors housing. For national findings, normalized categories and subcategories of deficiencies from CarePrepare™ covering 43 US states were considered. For the state-specific analyses, state-issued deficiencies were considered using each individual state's regulations.

FORMATION HEALTHCARE

Formation Healthcare Group provides critical insights into clinical and regulatory risks, operating trends, and opportunities in seniors housing and long term care to owners, operators, lenders, and investors through our services and solutions including Quality In-Cite, para-scope, CarePrepare, and consulting. For more information, visit www.formationhealthcare.com.

NIC MAP

NIC MAP believes data drives outcomes. We provide purpose-built data exclusively for senior housing, offering relevant, market-specific insights you won't find anywhere else, and we're empowering the senior housing industry to stay nimble and achieve optimal results. Our platform supports robust decision-making with real-time access to occupancy rates, transaction details, and construction project tracking, enabling industry leaders -- including the top senior housing operators, largest government agencies and major investors -- to navigate market complexities and capitalize on investment opportunities effectively. For more information, visit www.nicmap.com.

National Findings

TRENDS & KEY TAKEAWAYS

The data assessed for this analysis from CarePrepare included 43 states and 38,080 communities. Of these communities, 45% were cited for deficiencies from January 1, 2023 - December 31, 2024. The total number of deficiencies cited was 143,716 for an average per deficient community of 8 deficiencies and an average per all communities assessed of 4 deficiencies.

Regulations for licensure and operation of assisted living and memory care communities are state specific. Each state's timing of routine and other types of surveys (complaint, change of ownership, infection control, bed change, etc) varies and is not uniform amongst states or even between communities within states.
